Operational Manual – Part A
Bulgarian Virtual Airlines
RELEASE 1, REVISION 1

Prepared by:

Role	Name	Date
Director Flight Operations	Mihail Mihaylov	27.09.2026
Operations Control Center	Ivan Avramov	27.09.2026

Approved by:

Role	Name	Date
Chief Executive Officer	Svetlin Nikolov	27.09.2026
Director Flight Operations	Mihail Mihaylov	27.09.2026

Revision Record:

Revision	Issue Date	Summary
1	27.09.2026	Document release.

1 – General Information

1.0 BVA Mission & Document Scope

Our mission, as real as it gets. We aim to provide you with an extremely engaging, immersive, and authentic experience with Bulgarian airlines, bringing the spirit of Bulgarian aviation closer to you through realistic operations, carefully recreated aircraft, routes, procedures, and attention to detail. Whether you're an aviation enthusiast, a virtual pilot, or simply passionate about Bulgarian aviation, we strive to make every flight feel as close to the real thing as possible, while continuously expanding and improving our experience to create a community where the excitement, professionalism, and character of Bulgarian aviation can truly come to life.

The Operations Manual Part A (OM-A) establishes the general operational framework, organizational requirements, and company-wide policies governing operations within Bulgarian Virtual Airlines.

This manual applies to all BVA pilots, staff members, and other personnel operating under the BVA name, brand, and associated operators. It defines the fundamental requirements for participation in BVA operations, including pilot responsibilities, documentation compliance, flight monitoring, reporting, aircraft and livery standards, network operations, and applicable company requirements.

1.1 Flying at BVA

At BVA, we welcome pilots of all experience levels and backgrounds – from real-world airline captains to complete flight simulation novices. Before joining, please ensure you meet our mandatory requirements:

- Be at least 13 years of age.
- Submit a valid PIREP from the first 30 days of account creation.
- Register within our pilot forums (Discord server). Registration is free, and you can find the link in our Phoenix page under community, as well as the main page.

1.2 Pilot Termination

Resigning in good standing: Pilots and staff members who resign in good standing (i.e. providing an advanced notice of their intent to resign) retain the option to return to the airline at any point in the future. Their previous rank could be a subject to change.

Disciplinary Termination: Pilots and staff members who are terminated from BVA due to any disciplinary action, are permanently prohibited from re-joining the virtual airline at any time. This could be waved off only by the Chief Executive Officer.

OPERATIONAL MANUAL PART A – CHAPTER 1

1.3 PIREP Processing

All PIREPs submitted are processed automatically. A PIREP may take up to ten (10) minutes to be processed, during the course of which the PIREP will go through and finally settle on one of the statuses.

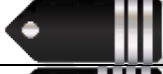

These include:

Status	Meaning
Accepted	PIREP has passed automated scoring and is now complete
Awaiting Review	PIREP has failed automated scoring or has been flagged for review.
Rejected	PIREP has been rejected automatically or by a staff member. Flight hours are retained; points are not.
Invalidated	PIREP has been invalidated automatically or by a staff member. Does not count towards hours or points.
Processing	PIREP is currently undergoing processing.
Reply Needed	PIREP requires pilot input before staff review can be completed.

PIREPs with the status “Reply Needed” require prompt attention – you will not be able to start any new flights until you respond. Rejected PIREPs earn flight hours only, not points; Invalidated PIREPs do not count towards hours or points at all. Leaving a PIREP comment, whether via ACARS or vAMSYS, will automatically send that PIREP for staff review.

1.4 Pilot Ranks

Pilot ranks are based on flight hours, points and bonus points up from Senior First Officer when reached within the organization.

Insignia	Pilot Rank	Requirements
	Cadet	N/A
	Second Officer	Hours: 300 Points: 30,000 Bonus Points: 1,000
	Senior First Officer	Hours: 300 Points: 30,000 Bonus Points: 1,000
	Captain	Hours: 600 Points: 60,000 Bonus Points: 13,000
	Training Captain	Hours: 1,000 Points: 100,000 Bonus Points: 18,000
	Base Captain	Hours: 2,000 Points: 110,000 Bonus Points: 30,000

Note: Bugs within the ranking system may occur, if you encounter such, please report it to a staff member from the Operational Control Center.

1.5 E-Mail Address

The pilot is responsible for maintaining the current e-mail address with BVA management. Any changes must be updated in 'My Settings'. A BVA representee may contact a pilot via email.

1.6 Focus Airports & Events

BVA aims to organize and create events wherever possible, together with partner virtual airlines and vACCs.

Focus Airports: each month, BVA management selects four destinations as Focus Airports. Flights to these airports earn bonus points.

Events: Regularly, the management posts roster events including ones with real-life operating schedules, as well as tours and other interesting events that pilots are free to participate in.

2 – Pilot Information, Requirements & Obligations

2.0 Active Status

To maintain an active status, we require the following rules:

- A minimum of 1 PIREP should be filed every 30 days.
- Each member should maintain an active and valid E-Mail address, as outlined in Section 1.3.
- BVA Pilot members are required to join the Pilot Forums (Discord) and, at minimum, read announcements, active NOTAMs as outlined within section 2.1.

2.1 Pilot Forum Requirements

Membership of the BVA pilot forum (Discord) is required and provides the ability to interact and benefit from discussion with fellow pilots. It is free to join.

- The forum requires its own registration (free).
- Register using your first and/or last name and Pilot ID, e.g. "Joe Bloggs - BUL0001".
- Each member who posts in the Pilot Forum, VATSIM, or any Flight Simulation Forum shall always maintain a professional manner. Racism, rude or discourteous comments, harassment, profanity, or anything else deemed questionable by forum moderators and reported to BVA will subject the member to disciplinary action, up to and including suspension or termination.

OPERATIONAL MANUAL PART A – CHAPTER 2

2.2 Documentation Compliance

We require all pilots apart from the Bulgarian Virtual Airlines network, to comply and follow all posted documentation by the Flight Operation Team. These include:

- Operational Manual Parts A and B
- Base and Airport briefings (Operational Manual C)
- Flight Crew Training Manual
- Flight Crew Operational Manual
- Quick Reference Handbook

A revision of a pilot document will be announced within the Pilot Forum.

2.3 Flight Crew Responsibilities

Prior to each flight, it is recommended:

- Pilots check for any document revisions.
- Comply with BVA SOPs, as well as required company procedures.
- Check for active company NOTAMs, including airspace/airport specific ones.

2.4 Flight Recording & Monitoring

BVA is a proud user and member of the vAMSYS system for VAs.

- The aircraft must depart from the booked departure point and operate the booked aircraft type, completing the flight in accordance with the filed flight plan unless a diversion is required.
- Any attempt to manipulate, alter, or otherwise interfere with the recorded flight outcome, flight profile, or flight time is strictly prohibited.

2.5 Manual PIREP Claims, Air Safety Reports & Technical Log

When a pilot is required to file a Manual PIREP, ASR report and/or technical log, they should follow the formats presented below:

- A Manual PIREP claims should include the reason for the claim, departure and arrival time and evidence (Volanta, Elevatex, FSHub and VATSIM Radar are the only approved software/websites that can be included as evidence).
- ASRs should clearly state the nature of the occurrence, including relevant flight details and circumstances surrounding the event. Reports should include supporting evidence where applicable, such as screenshots, logs, or other relevant documentation.
- A Tech Log entry should clearly describe the technical issue, including the affected aircraft system and relevant flight details. This is only applicable if random faults are turned on in the given operated aircraft.

2.6 Livery & Aircraft Policy

We require all pilots that:

- The aircraft being operated shall correspond exactly to the aircraft type and registration specified in the booking. Any deviation, including the use of a different aircraft variant or registration, shall result in PIREP invalidation.
- Only aircraft currently listed in the BVA fleet are permitted. Aircraft previously operated by BVA but no longer part of the active fleet shall not be accepted.

2.7 Network Competency

BVA encourages all pilots to fly on a network, preferably VATSIM due to the partnership with the Bulgaria vACC. While flying on the networks, we require our pilots to follow:

- To be able to follow all controller instructions.
- To be able to speak and understand standard ICAO phraseology.
- To comply with the respective network guidelines (e.g. VATSIM Code of Conduct)

Following the mentioned rules above, we also do not support the use of pirated software. Use of pirated software could result in disciplinary actions.

2.8 Operators, Bases & Identifiers

BVA covers, provides updated routes and flight information for the following companies:

ICAO	Voice Callsigns	Bases
LZB	"Flying Bulgaria"	LBSF
BVL	"Bulgary"	LBSF
GPX	"Ivory"	BKPR
BGH	"Balkan Holidays"	LBSF, LBWN, LBBG
BUC	"Eurocharter"	LBSF
GBG	"Vagabond"	LBSF
ADZ	"Migrator"	EDDP, EDDK
CGF	"Clever"	EDDP, EDDK
